Coleman & Fairburn constructed a new building to accommodate — Wood Tech, Computer Learning Centre, Food Technology and Hospitality, Design & Technology, PDHPE Stores and a small Gym. The building was built with a reinforced concrete frame incorporating a structural steel upper structure and cavity brick enclosing walls.

The building was built in the centre of playground areas and consequently interrupted access. Services had to be installed through one playground and general site access was via another oval play area. All play areas needed to be maintained for school use.

Renovations to an existing building included the removal of load bearing walls and the temporary propping and construction of new deep reinforced concrete beams and columns to create Music and Drama learning classrooms.

PENSHURST MARIST COLLEGE New TAS Bldg

EDUCATION

LOCATION 65 Victoria Avenue Mortdale

YEAR 2000

BUDGET \$1,300,000

ARCHITECT David Rumps Architect (Ph: 9586 0671)
