This project required extensive building works and new services to be built within and around school playgrounds.

Works completed involved the construction of a new Library with Classrooms, the partial demolition and complete renovation of another two storey building to provide a new Administration and Staff Facilities with Classrooms over, linking second floors of buildings with covered disabled access ramps, a new street entry, and partial strip out with new works within a second building to provide new Canteen and new toilets.

The use of bright colours were used both internally and externally to the buildings to create a fun filled learning environment for children. Classrooms were separated with acoustic operable walls and shared common wet areas creating a multipurpose space.
