

This project involved the construction of a new Library, a small Hall and a Computer Room at First Floor Level, with new Administration, Staff Facilities and a new Canteen on the ground floor. The new building also contains a new disabled access lift and has linking verandahs and covered access ramps to existing buildings. A new outdoor amphitheatre adjoins rejuvenated playground spaces.

Bright colours were used both internally and externally to the buildings to create a fun filled learning environment for children.

This project required extensive building works and new services to be built within and around existing school playgrounds.

ST ROSE'S PRIMARY SCHOOL ADDITION

LOCATION 8 Rose Street, Collaroy Plateau

YEAR 2004

BUDGET \$1,920,000

ARCHITECT TGP Architects & Planners P/L (Greg McGuirk)
