

This project was carried out in 3 stages. Four new GLA's and new student toilets were constructed in an undercroft area in stage 1. Once completed, stage 2 commenced: the relocation of the administration, library and computer room, together with the installation of a new lift. Stage 3 saw the refurbishment of existing GLA's and the construction of a new canteen.

Student and staff safety were primary concerns during the whole project, with temporary emergency exit routes being created for each stage. Soil decontamination also had to be managed during construction, whilst still keeping the school functioning at all times. No easy feat!

PRIMARY SCHOOL ALTERATIONS

LOCATION St Michael's Primary School, Lane Cove

YEAR 2006

BUDGET \$2,628,000
